Product Highlights

The WooPrinter-WiFi NG prints automatically WooCommerce Order Details on a Thermal paper. Thanks to the unique built-in email address and powerful quad-core CPU, running at 1.2GHZ, the WooPrinter-WiFi NG requires you to just connect / pair it with your wired / wireless router and it will start monitor its mailbox for new emails, which will print automatically once arrived. WooPrinter-WiFi NG works out of the box with Woo Instant notifications Plug-in for WooCommerce, which allows you to design the look of your receipts and to include and / or exclude information from the WooCommerce Order, based on your needs. In addition to the above with the purchase of the WooPrinter-WiFi NG you will receive a lifetime license to Woo Instant Notifications Pro. plug-in for WooCommerce.

Automatic Order Printing

WooPrinter-WiFi NG provides:

- Automatic Order Printing for WooCommerce

The automatic order printing feature for WooCommerce will give you the possibility to ease the order management and processing. Once the customer places an order , a receipt with the order details will be printed automatically and can be used by your employees to process the order more quickly.

Printer Customization

WooPrinter-WiFi NG provides:

- Manual reprinting of order details (from the WordPress Dashboard)
- Setting-up number of copies to be printed
- Adding a custom logo on each receipt

Manual re-printing is a must for some businesses. This may be useful in situations where more than one copy is needed and/or the printer paper finished in the middle of the print job (then manual reprinting may

be required.)

Some businesses need to print several receipts for example one for preparing the order and another one for shipping / customer receipt. In this case this feature gives you the flexibility to set the number of copies to be printed.
